FlamMap Training

Help System

There are tutorials and example datasets available with the installation of the FlamMap program. Tutorial modules are accessed via the FlamMap6 Help system. In FlamMap6 from the main menu select **Help > Help** to access the Tutorials and other useful modules that explain and illustrate using the FlamMap program and its geospatial fire modeling capabilities. Users are encouraged to go through the following Books and subchapters.

- Using FlamMap Help
- Using the Tree Pane
- Runs (FlamMap, FARSITE, Spatial FOFEM)
- Using the Display Pane
- Edit Landscape
- Utilities
- Tutorials

The individual Reference topics go into details about required input files, settings, descriptions of file formats, descriptions of data needed to run FlamMap, and outputs. These materials are linked to the various FlamMap dialogs and shortcut menus.

The Technical Topics section:

- you will find information explaining the background and science basis of the tools and models in FlamMap.
- Literature Cited section with supporting publications listed.
- Citing FlamMap examples of how to Cite FlamMap for use in projects and publications using FlamMap tools and applications.

Attribution: Any use of the data derived from FlamMap applications requires the following citation: **"Fire behavior and First Order Fire Effects calculations produced with FlamMap applications developed by the Missoula Fire Sciences Laboratory, Missoula, MT"**
