

Known Bugs and Issues, FlamMap version 6.0

If you think you have found a bug within FlamMap, we would appreciate hearing from you. Please check the Known Bugs below and the [FAQs](#) page to make sure that this problem has not already been resolved.

Then, send a copy of any screenshots and a detailed error message describing the problem and what you were doing when the problem arose to the

Fire Applications Help Desk via:

- Phone: (866) 224-7677 or (616) 323-1667,
- Fax: (616) 323-1665
- E-mail: IIA-Helpdesk@fs.fed.us
- Website: <https://iia-hd.peckham-enclave.us/>

In some cases, we may require that additional data and information be supplied. This often requires the creation of a FlamMap archive file. This can be accomplished within an active FlamMap project from the main tool bar, select File > Save and Archive. This will create a file with an .FZA extension. The FlamMap Help file also discusses the creation of this file.

Known Bugs, FlamMap Version 6.0

With the release of FlamMap6 previous versions of the software will no longer be supported. The most current version of the program can be accessed from this location: [FlamMap Software](#) page.
